*"We Love the Clean Style and Organization Achieved in our Garage Makeover"*

V.M. Ladera Ranch  
California

All Doors use High Quality "Press In" European Hinges. All Pantries have 4 hinges per door which prevents warping.

All shelves are fully adjustable! No fixed shelves means you can maximize the storage space to fit your storage needs.

The off the ground design prevents damage from moisture and makes it easier to keep your floor clean. Optional feet are available for those heavy storage needs.

Optional shelf stiffeners provide extra weight capacity while improving the style with a notched aluminum finish.

Meta-Box Style Drawers allow you to have easy access to the back of the drawer.

- COMPLIMENTS ANY DECOR
- EUROPEAN HARDWARE
- METABOX STYLE DRAWERS

## 100% Industrial Grade Melamine!

### Vision

Versatile Building Products, Inc., recognized the emerging market for cabinets designed for the garage. Cabinets naturally compliment Versatile's already popular Garage Floor Coating Systems. Versatile is the first national company to manufacture both the floor coatings and the made to order cabinet line. Additionally, our product lines are all "Made in the USA".

### What sets Versatile's Garage Cabinets part from the competition?

High quality, European Hardware and precision engineering are just a few of the reasons our cabinets lead the market. Our proprietary design requires "**Industrial Grade**" Melamine for **Strength**, not the cheaper "commercial grade" material. We also offer custom Aluminum Shelf Stiffeners which increase the shelf holding capacity while also adding to the bold style.

### Design

Our Cabinets offer tremendous storage capacity. We have designed the shelves to have maximum adjustability so you can move them to fit your changing storage items. Many systems

out there have fixed shelves which tends to create unused space. Cabinets are available in many colors that include White, Charcoal, Cherry, Maple and an ultra custom Charcoal Cabinet with Diamond Plate Doors. A sure hit for that high end look!

### Panel Board

Versatile Building Products, Inc. processes 100% Industrial Pine Melamine. Versatile will not use lower quality commercial board. Industrial grade is made with more glue than inferior specifications and is more expensive to manufacture. Industrial grade provides better screw holding and is stronger for holding weight. Pine while more costly to obtain, is the high standard for "softwood". Consequently Industrial Pine is structurally superior and more chip resistant than boards using inferior specifications. Industrial is what the Wood Institute and Architectural Woodwork Institute approves for use in cabinetry.

### Green

Our panels are the first in the industry to be licensed with Composite Panel Associations' Environmentally Preferable Product (EPP) downstream program.
